

OPEN MATHEMATICS

formerly Central European Journal of Mathematics

Ed. by Ugo Gianazza, Vincenzo Vespri

The journal aims at presenting high-impact and relevant research on topics across the full span of mathematics. Coverage includes:

- ▶ Algebra
- ▶ Algebraic Geometry
- ▶ Category Theory
- ▶ Complex Analysis
- ▶ Control Theory and Optimization
- ▶ Differential Equations
- ▶ Differential Geometry
- ▶ Discrete Mathematics
- ▶ Dynamical Systems and Ergodic Theory
- ▶ Functional Analysis
- ▶ Geometry
- ▶ Mathematical Logic and Foundations
- ▶ Mathematical Physics
- ▶ Number Theory
- ▶ Numerical Analysis
- ▶ Operator Theory
- ▶ Probability Theory and Statistics
- ▶ Real Analysis
- ▶ Topology

Why submit and read

Open Mathematics is a premier source of a high quality research. All published articles are made freely and permanently accessible online.

Authors benefit from critical peer review, language-correction services and promotion of published papers to readers and citers.

The journal uses continuous publication model - accepted manuscripts are

Thanks to Open Access, all articles are freely available to the academic community worldwide without any restrictions, there are more liberal policies on copyrights (authors retain copyright) and on self-archiving (no embargo periods).

The journal is archived in Portico.

Open Mathematics is a **fully peer-reviewed**, open access, electronic journal that publishes significant, original and relevant works in all areas of mathematics. The journal provides the readers with free, instant, and permanent access to all content worldwide; and the authors with extensive promotion of published articles, **long-time preservation**, language-correction services, no space constraints and immediate publication.

Open Mathematics is listed inter alia by Clarivate Analytics (formerly Thomson Reuters) - Current Contents/Physical, Chemical and Earth Sciences, JCR and SCIE. Our standard policy requires each paper to be reviewed by at least two Referees and the peer-review process is single-blind.
